

RTS22 Radio wall switch Format 55

The RTS22 wall switch from the Format 55 range is a battery-powered Easywave transmitter. The function of the wall switch is defined by combining it with different rockers.

The radio switch can be integrated into cover frames with a cut-out dimension of 55 x 55 mm produced by various manufacturers (see compatibility list).

The transmitter module is combined with the desired rocker, simply clicked into the frame and is immediately functional. It can then be mounted on the wall using either adhesive pads or screws.

The RTS22 is generally used as a light switch to turn lights ON or OFF with a 2-button operation as well as to control roller shutters.
