Tubular Motor Control

(e.g. for awnings and shutters)

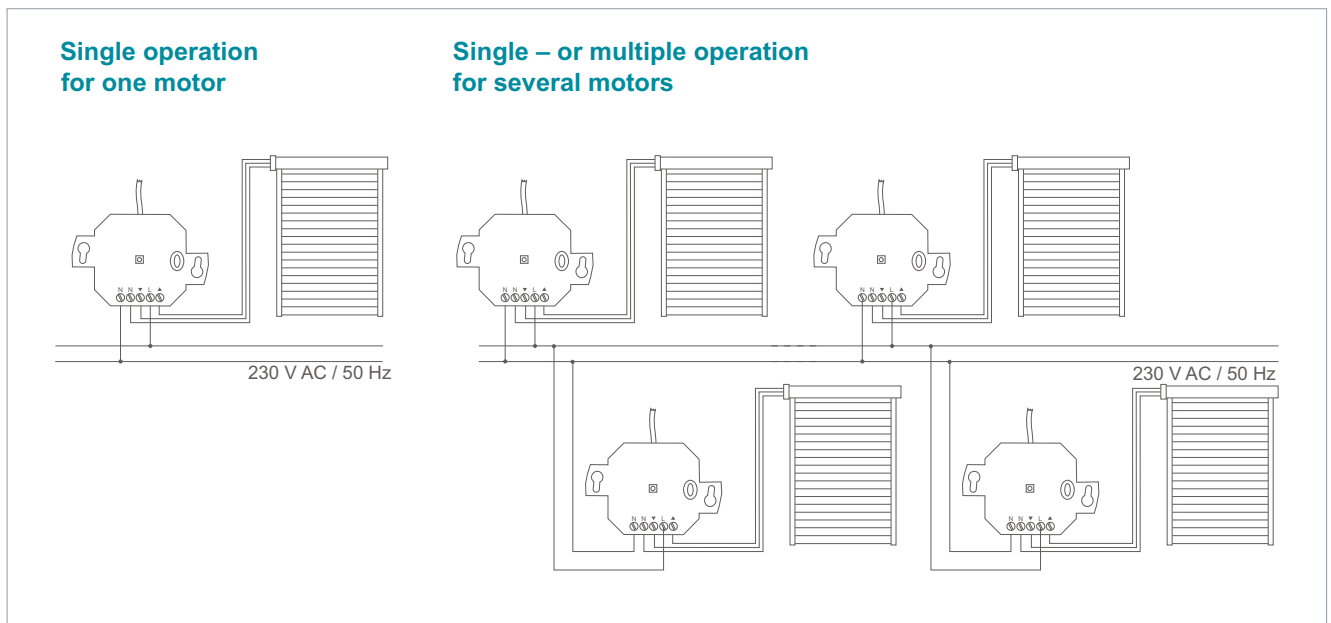

- ❖ Junction box receiver for shutters with 1- to 4-button-control.
- ❖ Simple modification with small effort – fits into every in-wall box and to every motor.
- ❖ Up to 32 transmitter codes can be memorized.
- ❖ Switching at the push of a button from every direction with hand transmitters and radio wall switches.
- ❖ Radio wall switches offer both time- and manual-control.
- ❖ The wireless light sensor additionally offers sun-protection and twilight functionality.

Comfort Through Technology.
