Control

Intelligent Time Dependent Radio Controls

- ❖ Up to 50 different switching times can be programmed per day or per week:

Holiday-Function: Programmable switching times with random variations.
Sunday mode can be activated by pushing just one button.

Summertime/Wintertime: Change from summertime to wintertime or vice versa by pushing just one button.

- ❖ In connection with the additional light sensor SL01:

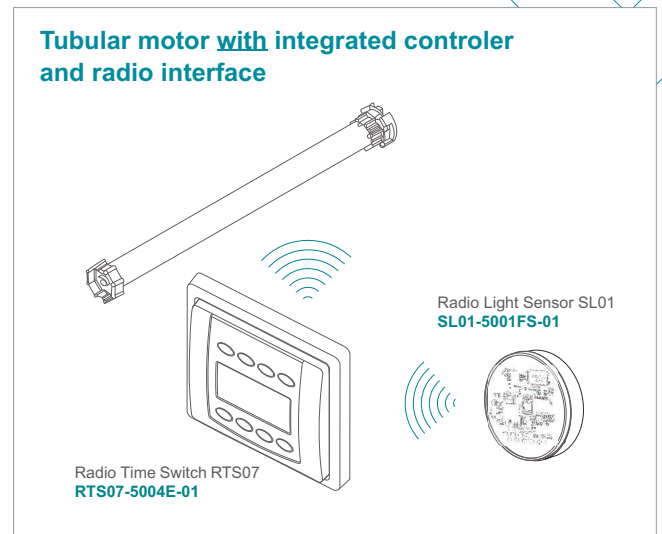

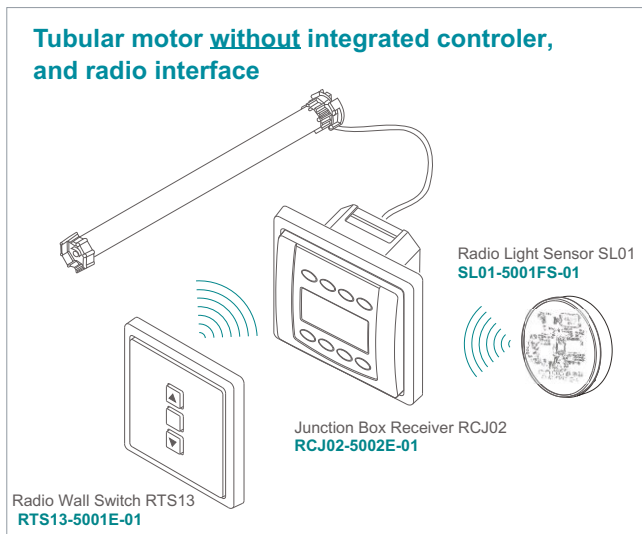

Solar Protection Function: If a set brightness value is exceeded the shutters are lowered to the desired position.

Twilight Function: If the brightness falls below a defined value the shutters are closed.

Comfort Through Technology.

Examples of Operation/Feature Survey:

Push Mode Button Display	Function Activated					
	manual	switching times	terrace mode	holiday mode ⁽¹⁾	solar protection ⁽²⁾	twilight ⁽³⁾
MANU	x	-	-	-	a	a
AUTO	x	x	-	-	a	a
MANU/AUTO ⁽³⁾	x	-	x	-	-	-
AUTO	x	-	-	x	a	a

(1) switching times +/- 15 min. (random)
 (2) this mode has to be activated specifically (a)
 (3) mode stays activated until 24:00 hrs

ELDAT Standards lead the way:
